

As well as ensuring we provide you with delicious food, our priorities are also focused on delivering your order in perfect condition and as best possible inline with our sustainability commitment.

In order to achieve this we will use plastic bubble wrap which still continues to offer the best solution for undamaged goods upon your receipt together with reused cardboard for added protection where required.

The bubble wrap protection used within our parcels has a minimum 30% recycled content and is 100% recyclable.

We continue to work with our suppliers to increase the recycled content as well as continuing to explore different methods of protection that work with our products.

All the products we produce in glass jars, basins and presentation cartons are all reusable as well as being 100% recyclable.

Please continue to visit this page for further updates on our progress to become as green as possible.

Best Wishes

The Angels.
